Dear Hiring Manager,

I am writing to express my interest in the **Testing & Commissioning Engineer** position at **Voltech Group**.

I am a **B.Tech graduate in Electrical and Electronics Engineering**, from the 2018–2022 batch, with all degree requirements successfully completed in 2026. During the period after my academic batch, I worked across different sectors to gain practical, hands-on experience, develop professional skills, and remain connected with evolving technologies and industry practices.

My experience across different work environments has helped me develop adaptability, problem-solving skills, teamwork, and the ability to learn and work with new technologies. I believe this practical exposure, combined with my academic foundation in **Electrical Machines, Power Systems, Electrical Measurements, Power Electronics, Control Systems, and Protection**, provides me with a strong foundation for a career in testing and commissioning.

I am particularly interested in developing my career in **electrical testing, commissioning, troubleshooting, maintenance, and power-system projects**. I am willing to work at project sites across India and am comfortable with travel and field-based responsibilities. I am also highly motivated to learn industry standards and procedures and to build long-term expertise in the testing and commissioning domain.

I believe Voltech Group would provide an excellent environment for me to apply my technical knowledge, practical experience, and willingness to learn while contributing effectively to project execution.

I would appreciate the opportunity to discuss my profile and suitability for the position. My resume is attached for your consideration.

Thank you for your time and consideration. I look forward to the opportunity to hear from you.

Sincerely,
SUMESH SM
